

ROLAND SANDS DESIGN[®]

PRESS RELEASE

KEEP IT RIGID

When the front fender is removed from the stock forks it may look good but you end up with a fork that twists and sways worse than a drunken sailor. We tested this on our last ride out to Sturgis and the difference the fork brace made is amazing. Add our front fork brace to maintain the simple and clean vintage look of running no front fender without the handling problems.

Chrome Hardware Included. For use with up to a 21" X 3.5" Front Wheel.

To order your own, just contact your local Drag Specialties dealer; or if you are ordering internationally visit www.rolandsands.com to find your closest dealer. While you are there you can also check out the complete line up of RSD products.

RSD's Front Fork Braces are available in Chrome for MSRP \$149.95 or Black Powder - Coat for MSRP \$129.95

MEDIA: If you are interested or need high resolution images, pricing information or part number information please email Lauren Hargrove at Lauren@rolandsands.com.
