

ROLAND SANDS DESIGN[®]

PRESS RELEASE

SOMETIMES LESS IS MORE

Eliminate that unsightly license plate on the back of your bikes fender. Clean it up with the RSD side mount tail light and license plate holder. This piece directly bolts on to the OEM passenger foot peg hole to vertically mount your license plate, and the dual circuit LED light works as both tail and brake light. The rifle drilled tail-light housing and beehive shaped lens give you a classic hot rod style. We have been building these for years for our project bikes and now they are available for you. Keeping it clean just got easier.

To order your own, just contact your local Drag Specialties dealer; or if you are ordering internationally visit www.rolandsands.com to find your closest dealer and check out the complete line up of RSD products.

RSD's Tracker Tag Brackets are available in Chrome or Black for MSRP \$229.95

MEDIA: If you are interested or need high resolution images, pricing information or part number information please email Lauren Hargrove at info@rolandsands.com.
